

UNIVERSAL STANCE

REACH-FORK[®] TRUCK

MODEL 7500

Given today's trend toward higher racks, the universal stance *Reach-Fork* truck Model 7500 allows the operator to comfortably look straight up while storing and retrieving loads. With the universal stance, the driver can face forward with an open view when handling and storing pallets, and face the direction of travel when moving tractor-first. An optional secondary control assists in bi-directional travel, which allows operators to be more efficient when transporting loads. Eco-Performance with the *ACR System*[™] uses 21%* less energy than the leading competition, lowering energy costs while increasing productivity. Plus the Model 7500's efficient design ensures fewer parts and easier access for quick and simple maintenance. The flexible and ergonomic universal stance *Reach-Fork* truck Model 7500 excels in dock, narrow aisle and higher stack applications.

UNIVERSAL STANCE MODEL 7500

ECO-PERFORMANCE »

Maximize economic and ecological technology to lower costs and increase your productivity with Raymond's Eco-Performance and exclusive *ACR System*. You'll also use up to 21%* less energy, and return up to 10% of every amp back to the battery with our regenerative lowering technology. Eco-Performance means fewer battery charges and reduced downtime. And the universal stance *Reach-Fork* truck takes up to 9%* less time to move product than the competition.

PRODUCTIVITY »

With the open view mast, operators can clearly see the baselegs, load, and rack. This enhanced visibility, precise control and handling delivers a faster, more efficient operation. The operator will experience both a better ride and smoother load handling with the patented A-frame and steered idler wheel that provide full-time traction and steer alignment over tight turns. This is important for handling high, heavy loads. With the universal stance *Reach-Fork* truck, jolting "caster snap" is eliminated for superior control and smoother, more precise handling.

ERGONOMICS »

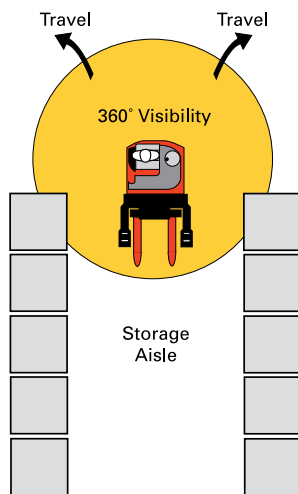

With operators averaging up to 10-hour shifts per day, it's important to maintain productivity throughout the day. The universal stance *Reach-Fork* truck Model 7500 faces forward when handling and storing pallets and faces the direction of travel when moving tractor-first. By facing the direction of work, operators are productive in busy, high-traffic warehouses. The operator can look up with ease in higher rack applications. An optional secondary control assists in transporting loads when traveling tractor-first.

MAINTENANCE »

Designed for increased uptime and reduced maintenance costs, the universal stance *Reach-Fork* truck boasts fewer parts and easy-to-remove panels for quick access to the electrical and hydraulic components. Bolt-on ductile baselegs absorb impact stress better than welded baselegs, providing long-term durability. Cushioned mast stops absorb both impact and noise for less jarring of loads and shock to the operator. And bolt-on wheel plates make load wheel changes quicker for a lower cost of ownership.

Universal stance provides 360° visibility.
